

JETTER

Pipeless Roll-up Door

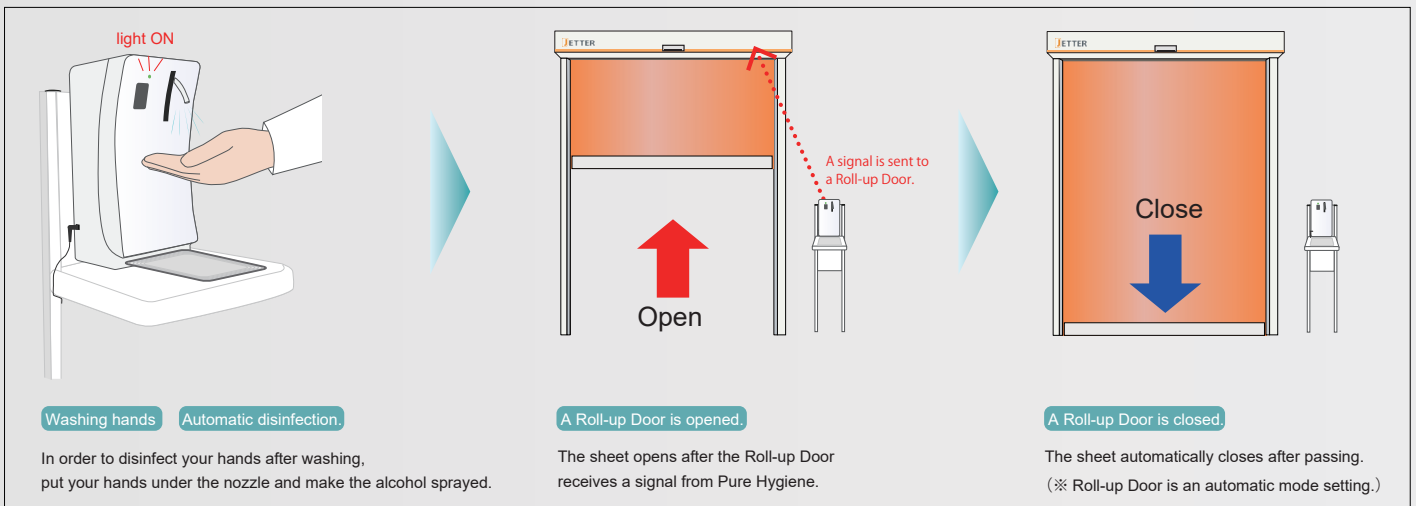

Automatic alcohol sprayer.

Pure[®]
Hygiene

*Pure Hygiene is a product of Tokyo Electron Ltd.

High-speed Roll-up Door • Automatic alcohol sprayer interlocking system.

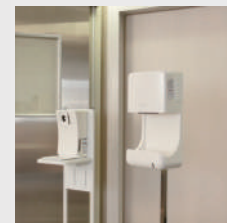

Interlocking with a High-speed Roll-up Door allows a person entering a room without touching after an alcohol disinfection, which can be effective for the prevention of viral infectious diseases or food poisoning. In addition, it can restrict the non-disinfected worker entering a room.

※ Pure Hygiene can be interlocked with both JETTER and SMOOTHER.

This product is recommended for the following places!

- Food factories
- Clean rooms of pharmaceutical factories and precision machinery factories etc.
- Medical facilities etc.

It is possible to interlock an automatic sliding door and an automatic alcohol sprayer, or an additional interlocking with an automatic hand dryer is also possible.
